

## FIRE SAFETY PROJECT

# Fire Protection Solutions for HSIA Terminal III

Design, procurement and installation support for fire protection solutions under the Dhaka Airport Expansion Project (Terminal III).

**EMPLOYER**

Aviation Dhaka Consortium (JV of Mitsubishi, Fujita & Samsung)

**FUNDING AGENCY**  
JICA

**LOCATION**  
Dhaka

**EPC / ROLE**  
ARIDOD

**PROJECT VALUE**

BDT 42 Crore (For Fire Rated Doors & Windows Part)

**STATUS**  
Completed

## SCOPE / ROLE

Design & drawing

Compliance to international standards (UL/BS)

Production management

Inline inspections

Shipping & transportation to the site

Installation (phase-wise)

## PROJECT HIGHLIGHTS

- ✓ Comprehensive fire protection solutions ensuring life safety and asset protection for a world-class airport terminal.
- ✓ Compliance with international standards (UL/BS) and applicable aviation regulations.
- ✓ Supply and installation of fire rated doors & windows and associated fire safety systems with airport-grade quality.
- ✓ Coordinated logistics, inspections and documentation to ensure on-time delivery and compliance.
- ✓ Phase-wise installation aligned with terminal construction schedule for seamless integration and commissioning.

**FIRE SAFETY**

Advanced fire protection systems for people, assets and operations.

**STANDARDS COMPLIANCE**

Designed & delivered in compliance with UL/BS and aviation standards.

**AIRPORT INFRASTRUCTURE**

Solutions tailored for large-scale, high-traffic aviation environments.

**PHASE-WISE DELIVERY**

Planned execution in phases to align with construction milestones.

**QUALITY ASSURANCE**

Rigorous inspections and quality control for reliable performance.
